* _____ would like to formally join the Australian Digital Theses (ADT) Program.

In joining, * _____ undertakes to abide by the conventions and standards required for submission and/or deposit of digital theses to the ADT Program. We understand that these conventions are necessary to maintain the integrity and quality of the distributed database.

Furthermore, as a participant we undertake to fully support the aims and philosophy of the ADT Program. These are to establish a local program for the deposit and/or direct submission of digital theses, to promote this program locally, to lobby for the rules of submission to be changed in order to accept digital versions at least as an option, to work towards integration of the digital program with the normal processes and procedures as prescribed locally, to ensure where ever possible that the local digital theses be available for world wide release and to contribute to the maintenance of the project by sharing information, experiences and resources.

The ADT Program will provide an appropriate copy of the ADT deposit/submission software, instructions on installation and general setup support as required.

We look forward to working with the group in this unique Australian initiative.

Your Sincerely
